Subject: public comment C&D burning

This is the letter that I have mailed to Robert Sydney concerning the reclassification of Construction & Demolition debris. As a member of the Zoning Board of Appeals I voted in favor of a proposed biomass plant to be built in the Town of Russell, with the stipulation that NO CONSTRUCTION & DEMOLITION material would be burned. If construction and demolition debris was to be considered as fuel I would NOT HAVE VOTED IN FAVOR OF THIS PROJECT.

I agree with a statement by Alan Noger, Clean Energy Program Director for the Union of Concerned Scientists, that the State lacks the means to see that all construction and demolition materials will be efficiently and effectively sorted before these materials are burned.

I know that there are lots of problems with the disposal of these materials. My wife and I are strongly opposed to the burning of C&D materials at the proposed biomass plant in Russell, or at any biomass or incineration plant in Ma.

Sincerely, Bruce anderson and Joan Anderson
